PHP/LARAVEL Engineer

I love to help businesses build and maintain SaaS products, especially when they are built with a Laravel stack. I also love optimizing UI/UX with modern JavaScript and TypeScript frameworks like Vue.js or React.

PROFESSIONAL EXPERIENCES

+Simple.fr, France, *R&D Engineer*

January 2023 up to now

In the insurance field, I participate in product and feature development while ensuring clear technical documentation and effective knowledge transfer.

Werin Group, France, Backend Engineer

June 2018 to October 2022

I was assigned to a final client in the logistics field, where we built, maintained, and supervised their platform while also connecting it to partners.

Morocco Safety Industries, Morocco, *Integration Engineer*

Mars 2015 to Mai 2018

Integrating safety solutions, IT solutions, and IoT into internal platforms designed to deliver services to end customers.

Alten Maroc, Morocco, *Php Developer*

Mars 2014 to January 2015

Participate in designing and building websites and applications for end clients.

Capgemini Maroc, Morocco, *System Engineer*

May 2013 to February 2014

Elaborating and designing specifications for various projects.
